## EDUCATION

Open Labs NIIT Technology  
Institute  
Tema, Ghana  
Software Development

St. John's Grammar School –  
Achimota, Ghana  
General Science

# Prince Tetteh Adjei

## SOFTWARE DEVELOPER

Motivated and self-driven Software Developer with hands-on experience building desktop applications, inventory systems, hotel booking systems, and e-commerce platforms using Python, MySQL, PostgreSQL, HTML, CSS, React, WordPress, Typescript and modern development tools. Passionate about creating practical software solutions that improve business operations and user experience. Strong problem-solving skills with experience in UI design, database management, and business-focused software systems.

## PROJECT EXPERIENCE

### Dating App Project

- Built a modern **dating** platform focused on user interaction and matching experiences
- Worked on frontend UI/UX, **authentication systems**, and scalable backend architecture
- Implemented responsive design and **real-time interaction** concepts

### Game Hub – Gaming Discovery Platform

- Developed a gaming discovery web application using React and **the RAWG API**
- **Integrated game search, ratings, genres**, and dynamic content fetching
- Built responsive UI components and **API-driven user experiences**

### Coffee Shop Website

- Designed and developed a **modern coffee shop website** with **responsive layouts** and attractive UI design
- Focused on user experience, branding, and modern frontend design principles

### Full-Stack E-Commerce Management System

- Built a desktop and database-driven shopping system **using Python, MySQL, and Custom Tkinter**
- Developed order management, cart systems, stock handling, and payment workflows
- Designed relational database architecture and authentication systems

### Telegram Match Bot

- Built a Telegram-based matching bot for connecting users through automated interactions
- Implemented user matching workflows, messaging logic, and bot automation features
- Integrated Telegram Bot APIs and command handling systems

### Inventory Management System – Water Factory

- Created a stock management system to improve inventory tracking and operational efficiency
- Implemented automated calculations and reporting systems

## AND OTHERS
